**The ACT Matrix** Feb 20 2023 If you are an ACT practitioner or mental health professional, this eagerly awaited resource is an essential addition to your professional library. Acceptance and commitment therapy (ACT) is an evidence-based therapy that has been successful in treating a variety of psychological issues, such as anxiety, depression, substance abuse, trauma, eating disorders, and more. In contrast to other treatment options, ACT has proven extremely effective in helping clients who are "stuck" in unhealthy thought patterns by encouraging them align their values with their thoughts and actions. However, the ACT model is complex, and it's not always easy to use. Traditionally, ACT is delivered with a focus around six core processes that are often referred to as the hexaflex: cognitive defusion, acceptance, contact with the present moment, observing the self, values, and committed action. Each of these core processes serves a specific function, but they are often made more complex than needed in both theory and in practice. So what if there was a way to simplify ACT in your sessions with clients? Edited by clinical psychologists and popular ACT workshop leaders Kevin L. Polk and Benjamin Schoendorff, *The ACT Matrix* fuses the six core principles of acceptance and commitment therapy (ACT) into a simplified, easy-to-apply approach that focuses on client actions and behavior as workable or unworkable, rather than good or bad. Most importantly, you'll learn how this innovative approach can be used to deliver ACT more effectively in a variety of settings and contexts, even when clients are resistant or unmotivated to participate. This is the first book to utilize the ACT Matrix model, and it is a must-read for any ACT practitioner looking to streamline his or her therapeutic approach.

**Agrarian Problems in the Sixteenth Century and After** May 19 2020 Presenting a full and precise description of all legal ties between landlord and tenant in early modern England, *Agrarian Problems in the Sixteenth Century and After* re-examines one of the key issues in English agrarian history - the question of the legal security of the copyholder. Comparing historical records and literary evidence, *Agrarian Problems in the Sixteenth Century and After* reprints much of the important 1969 edition of the book, and asserts that: \* customary tenants enjoyed legal security in and before the sixteenth century \* enclosures proceeded legally, without oppression, and in much the same form (whether ratified in parliament or not) throughout the whole period \* depopulation was less extensive than sometimes supposed and that such depopulation as there was often proved economically profitable and not without social benefit. When first published in 1969, this fascinating book represented a unique viewpoint that affected, and in some cases reversed, much accepted opinion. As a landmark work in a highly important area of English agrarian history, it still has considerable impact today.

The Oxford Handbook of Clinical Psychology Mar 09 2022 The exponential growth of clinical psychology since the late 1960s can be measured in part by the extensive literature on the subject. The field has come to be defined as much by its many topics as its many voices. The *Oxford Handbook of Clinical Psychology* synthesizes these decades of literature in one volume. In addition to core sections on topics such as training, assessment, diagnosis, and intervention, the handbook includes chapters devoted to emerging issues in the clinical field, including health care reforms, cultural factors, and technological innovations and challenges. Each chapter offers a review of the most pertinent literature, outlining issues and identifying possibilities for future research.

*Showing How* Oct 16 2022 This book is thoroughly original work on the meaning of teaching by one who has been widely credited with reshaping the field of religious education in the United States, and to have had a significant effect also in many other countries. Despite a steady flow of books that have "teaching" in the title, nearly all of them leave out most of the story. In *Showing How*, Gabriel Moran presents the full story of the act of teaching. Part 1 establishes a fundamental meaning for "to teach," examining why there exists a deep-seated fear that teaching is an immoral act. Professor Moran then grounds the meaning of "to teach" in its most basic forms, moving from examples in the nonhuman world (what the mountain teaches the mountain climber) to communal and nonverbal forms of teaching among humans. Part 2 explores the languages of teaching and the diverse forms of speech appropriate to teaching; rhetorical forms, including storytelling and preaching; therapeutic languages; and religion" preservation of these languages in ritualized settings, including confessing and mourning. Part 3 draws out the implications for education, the school, and the teaching of morality. *Showing How* addresses not only schoolteachers but parents,

counselors, ministers, administrators, and everyone who can recognize teaching as a fundamental human act. By exposing the root meaning of teaching, the book represents a challenge to any proposals for educational reform. Gabriel Moran is Professor and Director of Religious Education in the Department of Culture and Communication, New York University. He is the author of sixteen books, including *Uniqueness: Problem or Paradox in Jewish and Christian Traditions* and *A Grammar of Responsibility*.

**Essential Principles of Contract and Sales Law in the Northern Pacific** Feb 08 2022 Taking an anthropological approach, *Essential Principles of Contract and Sales Law in the Northern Pacific* highlights how regional customary and traditional law interact with Anglo-American concepts of contract and sales law to produce a unique amalgam of substantive law in this Pacific region. Author and law professor Daniel P. Ryan compiles and discusses the current contract and sales law applicable in the Pacific region, including the Republics of Palau and the Marshall Islands, Hawaii, Guam, Northern Mariana Islands, American Samoa, and the Federated States of Micronesia. Ryan compares and contrasts this regional law to international standards, including the UN Sale of Goods Convention, the UNIDROIT Principles of Contract Law, UNCITRAL Model Law for E-Commerce, the Uniform Commercial Code, the Revised Uniform Commercial Code, and the Restatement (Second) of Contracts. *Essential Principles of Contract and Sales Law in the Northern Pacific* is essential reading for members of the judiciary, academics, practitioners, students, and businesses within the region and their major trade partners.

The Role of the Romanian Army in the Act of August 23, 1944 Jan 19 2023 From the interwar period until the end of the Second World War, Romania was in a kind of geopolitical labyrinth, in which it seemed to have multiple possibilities, but they all went in the same direction: the alliance with Germany at the beginning of the Second World War, the act of August 23, 1944 as it stood, and the status subsequently established by the Treaty of Paris. Throughout this period, the Romanian Army played a major role through its leaders and the sacrifice of the Romanian soldiers, and the act of August 23, 1944 was a legitimate and legal act, in which King Mihai I and the Army were the main decision makers. After a presentation of the context of Romania's entry into the Second World War, follows the description of Romania's evolution during the war, with emphasis on the attempts to conclude an armistice with the Western Allies and the role of the Army during this period. The act of August 23, 1944 is then detailed separately, highlighting the diversity of opinions on this event. The last section presents the implications of this act on Romania, after the end of the Second World War. CONTENTS: Abstract 1. The context of Romania's entry into the Second World War 2. Second World War 3. The act of August 23, 1944 4. Implications of the act of August 23, 1944 Bibliography Notes DOI: 10.13140/RG.2.2.31080.55040

**The Act of Musical Composition** Dec 18 2022 The study of musical composition has, in the main, been informed by anecdotal after-the-event accounts or post hoc analyses of composition. This book presents the first coherent exploration around this unique aspect of human creative activity. The central threads, or key themes - compositional process, creative thinking and problem-solving - are integrated by the combination of theoretical understandings of creativity with innovative empirical work.
