Some were presented at the Lynschrift on May 19-20, 2018; others were written especially for this volume. The papers report original research on, or research-based theoretical analyses of, several of the domains that Professor Frazier contributed to during her career. The volume begins with a brief overview of Professor Frazier's research contributions and an appreciation of the contributions she has made to the field of psycholinguistics and to her students and colleagues. The next several chapters discuss the roles that prosody plays in language processing, and the volume continues with chapters on the topic that established Professor Frazier as a major psycholinguistic theorist, syntactic processing. The volume then explores the roles semantics and pragmatics play in language comprehension, and concludes with reports of applications and extensions of research on language processing. All chapters were contributed by current and former students and colleagues of Professor Frazier in gratitude for the impact she has had on their lives and careers. The

NIV Application Commentary helps you communicate and apply biblical text effectively in today's context. To bring the ancient messages of the Bible into today's world, each passage is treated in three sections: Original Meaning. Concise exegesis to help readers understand the original meaning of the biblical text in its historical, literary, and cultural context. Bridging Contexts. A bridge between the world of the Bible and the world of today, built by discerning what is timeless in the timely pages of the Bible. Contemporary Significance. This section identifies comparable situations to those faced in the Bible and explores relevant application of the biblical messages. The author alerts the readers of problems they may encounter when seeking to apply the passage and helps them think through the issues involved. This unique, award-winning commentary is the ideal resource for today's preachers, teachers, and serious students of the Bible, giving them the tools, ideas, and insights they need to communicate God's Word with the same powerful impact it had when it was first written. Updates from the 1988 edition include sections on appositive constructions, parasitic gaps, contrastive negation, and comparative conditional sentences and expanded coverage of cleft sentences and free relatives. Annotation copyrighted by Book News, Inc., Portland, OR. This volume presents new and cutting-edge research on the question of how we parse, interpret and understand language in more complex discourse settings. The challenge is to find empirical evidence on how information structure and semantic processing are related. Comprehensible answers are provided by showing how syntax, phonology, semantics and pragmatics interact and how they influence semantic processing and interpretation. The analysis of core information structural concepts that contribute to processing such as focus and contrast, the specific discourse status of referents that add to the common ground, context dependency and markedness as well as prosodic prominence and givenness marking has added new and convincing evidence to the research of information structure and semantic processing. 1.
